

Welcome to the 29th Emergency Abdominal Surgery Course. The first was held in Letterkenny Donegal Ireland in May 2012. Courses have expanded around the World. This course builds on previous success and is further enhanced by a large international and national faculty who are at the coal face in Emergency Surgery.

EASC has evolved into a world leading course in Emergency Abdominal Surgery. EASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach. It will bring you a level of discussion you have not heard before and enhance your ability on-duty as a surgeon, gastroenterologist or radiologist; either as a trainee or a specialist. This course is about decision making in patients and common emergencies. The course is endorsed by many societies. It is constantly updated with the latest advances in Emergency Surgery Care.

Course Goals

Understanding the natural history of key emergency surgery presentations, with emphasis on decision making and operative/intervention/imaging tips and traps to optimise outcome. This coupled with a manual containing lectures and the latest literature references will ensure your patients are getting optimal outcomes.

Who should attend ?-

If you treat or manage a patient with an acute abdomen this course is a must for you!

Ideal refresher for Consultants also

Donegal Clinical Research Academy would like to thank RCSI, WSACS and WSES and in particular the many faculty over the years for their support without whom we could not share this course with you. SEUBP through the Centre for Personalised Medicine Emergency Surgery Cluster are supporting and advancing Emergency Surgery Care.
