

Welcome to the 18th **Medical student** Emergency Abdominal Surgery Course (**sEASC**). This course is based on the award winning EASC for registrars/junior consultants. The first EASC course was held in Letterkenny, Donegal Ireland in May 2012.

The student course is tailored to curriculum of medical students. It is an ideal preparation for those who wish to excel at their exams. Since the first course in 2015, sEASC is rated by final medics as one of the best educational events in their student's curriculum.

Courses in Emergency Surgery are developing with WSES, ESTES in Europe and MOSES in Australia and New Zealand. None have been pitched for the specific need of the medical student. sEASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach.

It will bring you a level of discussion you have not heard before and enhance your knowledge of presentations, symptoms, signs and management. This course is about the patient and common emergencies. It will help, not only with your exams but as a young doctor. It combines theory with practical cases. Over half of the course will involve discussion between consultants and residents. You will not be put on the spot – to promote a relaxing learning environment.

Course Goals

Understand key emergency abdominal cases
Make you a better-confident intern
Expose you to real scenarios
Great prep for your exams

Who should attend?

Final Meds and those in earlier years who want to do Surgery

Donegal Clinical Research Academy would like to thank Trinity College for their support.
