

Welcome to the 15th **Medical student** Emergency Abdominal Surgery Course (**sEASC**). This course is based on the award winning EASC for registrars/junior consultants. The first EASC course was held in Letterkenny, Donegal Ireland in May 2012 and has now been run in 10 countries. sEASC courses have now been held in Ireland, Brazil and Greece.

This award winning student course is tailored to curriculum of medical students. It is an ideal preparation for those who wish to excel at their exams. Since the first sEASC course in 2015 it is rated by final meds as one of the best educational events in their student curriculum.

Courses in Emergency Surgery are developing with WSES, ESTES in Europe and MOSES in Australia and New Zealand. None have been pitched for the specific needs of medical students. sEASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach. It brings a level of discussion you have not heard before and will enhance your knowledge of presentations, symptoms, signs and management. This course is about the patient and common emergencies. It will help, not only with your exams but as a young doctor. It combines theory with practical cases. Over half of the course involves discussion between consultants and residents. You will not be put on the spot and so it promotes a relaxing learning environment.

Course Goals

Understanding the natural history of key emergency abdominal surgery presentations. This coupled with a manual containing lectures and the latest literature references it will ensure you get optimal exposure to both theory and practice. This course will take your knowledge to the next level.

Who should attend?

Final Meds and those in earlier years who want to do Surgery

Donegal Clinical Research Academy would like to thank Trinity College for their support and the overarching support of the SEUBP funded Centre for Personalised Medicine, Clinical Decision Making and Patient Safety Cluster in Emergency Surgery. Thanks to our faculty who make all the difference.
